Maximize your new sales by using Variable Data in your next Direct Mailing!

What is Variable Data?

With variable data digital printing, you can send one layout file, that produces continually changing pages, without ever stopping the press! You no longer need to create separate layout files!

By sending **ONE** basic layout page, you can:

- Reflect changing, personalized text and elements on every printed piece.
- Customize client name, title, company name, mailing address, bar codes, images, or varying coupons or offers.
- Data from your detailed database is integrated into your print layout, to tailor your message to specific individuals and clients.

Advantages of Variable Data Printing

- Provides a more targeted, specific and strategic outreach to your desired audience.
- One-to-one communications are personalized and very affordable.
- Perfect for direct mail marketing campaigns.
- Quick set-up, gets your message to the market faster.
- Increased responses over traditional offset printing.
